Editor's Notes

Devastating hurricanes hitting the coastline of the United States and the Carribean Islands are the reality the mankind has to face today. This is not an episode of the movie we are watching, these are the results of our arrogant attitude to the Planet, the place we live in and care so little about.

FACTS OF THE WEEK – TO SHARE WITH FRIENDS AND FAMILY

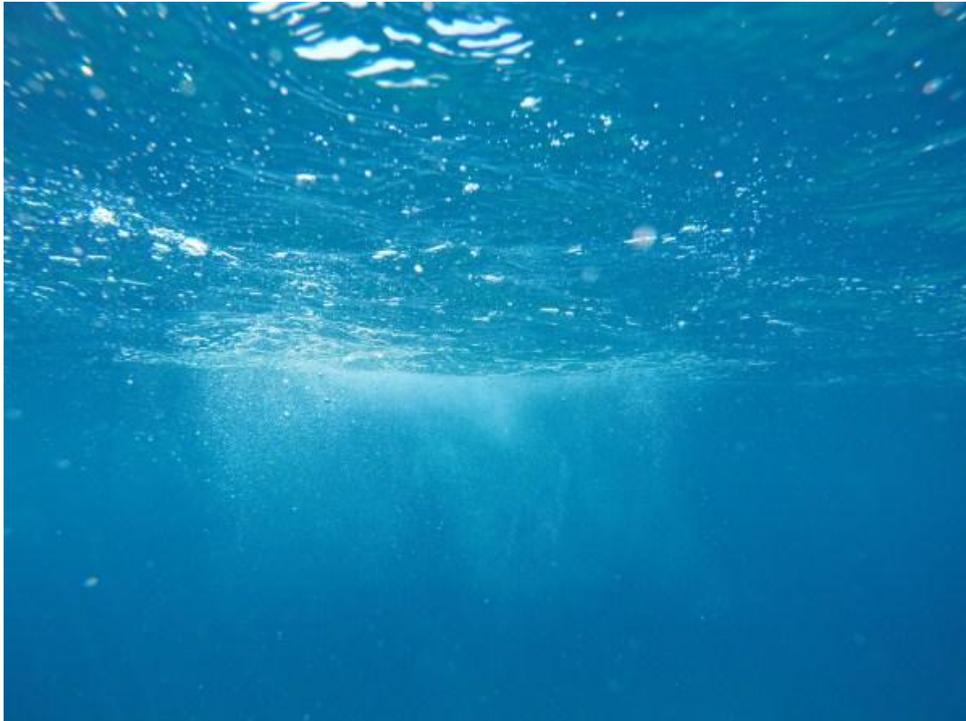

- Over 1 million square kilometres of Artic ice is lost every decade
- Global warming caused sea levels to rise 19 cms between 1901 and 2002 and is expected to increase them by a further 63 cms by 2100

- Global warming has led to increased frequency and intensity of storms causing increased deaths and devastation around the world
- 1% rise in global warming results in a 5% reduction in grain yields affecting food security of the planet and even more problems for poor farmers

We are pleased to brief you on latest events, progress and issues addressed under each of the SDGs as grouped into the 5Ps - **People, Planet, Prosperity, Peace, Partnerships**:

PLANET

Plastic fibres found in tap water around the world

"Microplastic contamination has been found in tap water in countries around the world, leading to calls from scientists for urgent research on the implications for health.

Scores of tap water samples from more than a dozen nations were analysed by scientists for an investigation by Orb Media, who shared the findings with the Guardian. Overall, 83% of the samples were contaminated with plastic fibres."
