SDG # 15 - Life on Land

The facts

- 3 billion people get 20% of their animal protein from fish but only 10 fish species provide 30% of marine capture
- Over 80 % of human diet is plants and 3 crops – maize, rice and wheat provide 60% of the energy take Globally so any interference / reduction of yields will be catastrophic.
- 1% rise in global warming results in a 5% reduction in grain yields affecting food security of the planet and has devastating effects on many sea creatures
- 80% of people living in rural areas of developing countries rely on traditional plant based medicines so loss of forests / vegetation can be devastating for their communities.

Quote of the week:

**“Poverty
is the worst
form of
violence.”**

Mahatma Gandhi,
Indian political and
spiritual leader

(Please share with friends, family and work colleagues and encourage them to join our community and help create a safer, fairer world for all)
